

1715

Kevlar®-reinforced, brushable coating for underwater, marine and wet-area environments. Forms extremely hard, glossy film with slight "orange peel" texture.

Available in 4L kits - grey only, 1:1 by volume mix.

Use For

- **Coating surfaces in wet environments.**
- **Attaching, sealing, repairing underwater.**
- **Lower viscosity alternative to 1725.**

Benefits

- ✓ Excellent overall resistance, including saltwater.
- ✓ Diver-friendly with brushable viscosity for easier application (not prone to stringing or floating).
- ✓ Completely waterproof with strong adhesion for protection against corrosion.
- ✓ Developed and manufactured in Australia.
- ✓ No solvents, flammables, corrosives or odours.
- ✓ Proven track record for over 10 years in dry, damp, wet and underwater environments.

Proven Applications

Water - tanks, reservoirs.
Infrastructure - bridges, ports.
Oil & Gas - pipelines, offshore.
