

# SCUBApoxy

Sticky when wet.

## 1725

Kevlar®-reinforced coating and adhesive for underwater, marine and wet-area environments. Forms extremely hard, glossy film with slight "orange peel" texture.

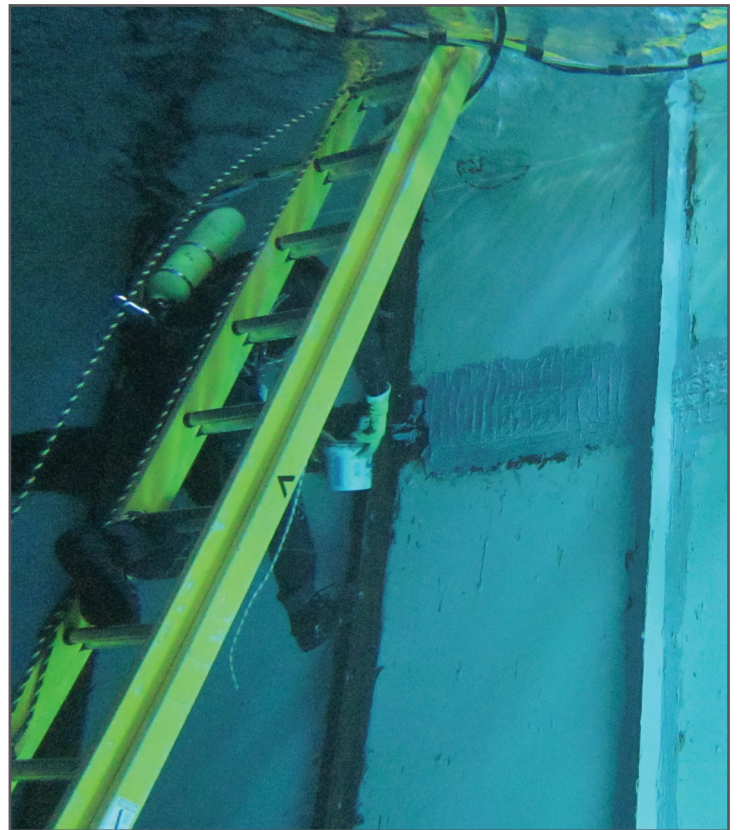

Available in 4L kits - grey only, 1:1 by volume mix.

### Use For

- **Coating surfaces in wet environments.**
- **Attaching, sealing, repairing underwater.**

### Benefits

- ✓ Excellent overall resistance, including saltwater.
- ✓ Diver-friendly for easier application (resin-rich, not prone to stringing or floating).
- ✓ Completely waterproof with strong adhesion for protection against corrosion.
- ✓ Developed and manufactured in Australia.
- ✓ No solvents, flammables, corrosives or odours.
- ✓ Proven track record for over 10 years in dry, damp, wet and underwater environments.

### Proven Applications

Water - tanks, reservoirs.  
Infrastructure - bridges, ports.  
Oil & Gas - pipelines, offshore.
