

DATA SHEET

PIGMENT POT

Stir-in, Metallic Pigment Additive for Epoxies

DESCRIPTION

A stir-in, metallic pigment pack for use in solventless two-pack epoxies.

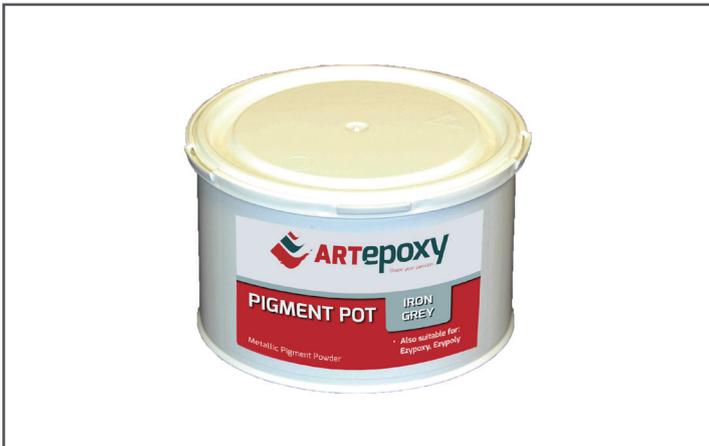

Quality pigments are selected for maximum lustre and UV stability, which allows the creation of stunning decorative floors when used with Artepoxy resins.

USES

Suitable for use in Artepoxy Liquid Crystal and Liquid Marble Decorative Floor Coatings.

PRODUCT DETAILS

Type: Metallic pigment powder.
Colour: 10 colours available - see colour chart.
Pack Size: 120g.

BENEFITS

- ✓ Pre-measured weight for simple use.
- ✓ Easy to disperse into epoxy coatings.
- ✓ Premium pigments - maximum lustre, UV stable.
- ✓ Can blend custom colours from original range.

MIXING

For full safety instructions, consult SDS. Wear protective clothing, goggles and gloves to prevent skin and eye contact.

Add one pigment pot per 12 litre kit. Scrape pigment into Part A and blend with a drill mixer until a consistent colour is obtained. Add Part B and mix thoroughly, scraping sides with a flat spatula to ensure all product is taken in.

PRODUCT NOTES

- Do not use in amounts greater than recommended. Too much pigment can lead to hazing or whitening of metallic effect.
- Take care to disperse powder completely. Clumps can lead to "streakers" or "comets" in the finish.

STORAGE

Keep containers closed when not in use. Store below 40°C. Do not store in direct sunlight. Shelf life is at least 12 months in original, unopened container. Seek advice from your local council regarding accepted disposal methods.

FIRST AID

CAUTION: KEEP OUT OF REACH OF CHILDREN.

IF ON SKIN: Remove immediately all contaminated clothing. Rinse skin with water. IF IN EYES: Rinse cautiously with water for several minutes. Immediately call a POISON CENTRE (Australia - 13 11 26) or doctor/physician. If skin irritation occurs: Get medical advice/attention.
