

Case History

1725 - Ship Repairs

Fremantle Diving Centre carried out basic repairs to the wooden hull of the replica Endeavour ship using 1725.

Antony Old from Fremantle Diving Centre said, "We have developed so many different applications for the Scubapoxy products, and have had such long lasting success with them, that we are now at the stage where we perform at least one job per week using Scubapoxy, ranging in quantity from a few litres to several hundred litres."

Fremantle Diving Centre has developed a multitude of uses for Scubapoxy underwater epoxy products and have field tested these applications on many projects with outstanding success.
